Guide for Inserting Click tags on HTML5 banners:

Sample click tag insertion

Here's an example of a click tag inserted in an HTML document:

```
<html>
<head>
<meta name="ad.size" content="width=300,height=250">
<script type="text/javascript">
var clickTag = "http://www.google.com"; </script>
</head>
[The rest of your creative code goes here.]
</html>
Make sure your creative uses the click tag variable as the click-through URL:
<a href="javascript:window.open(window.clickTag)">

</a>
```

Use Google Web Designer for exit events
